WORK EXPERIENCE

Application Developer (ReactJS)

May 2019 – Aug 2022

Edifecs Technologies Private Limited • Mohali, Punjab

My current role is to contribute to implementing visual elements that users will see and interact via web browsers with **ReactJS**, and to provide optimal solutions for problems which occur in day-to-day development of an enterprise level product.

- Contributed in creating custom SharePoint solutions (Spfx webparts) with SharePoint and Power Platform out of the box features to meet business requirements in a highly participatory process using Reactjs as affront End technology.
- Create prototypes, flowcharts, and related concept diagrams to demonstrate ideas and potential projects.
- Develop and maintain new and existing web-based and client/server applications by writing code using object-oriented design principles, HTML, Reactjs, JavaScript, CSS, JQuery, and REST APIs..
- Build design and development standards to ensure consistency across applications.
- Enhance, maintain, and troubleshoot application requests.
- Provide support to other team members through problem solving and issue troubleshooting

UI Developer (ReactJS)

May 2018 - May 2019

ONE Business Consulting Group • Mohali, Punjab

As a frontend developer I was handed the responsibility to overall plan and develop robust web applications in **ReactJS**, . Understanding and managing client interactions and requirements was also the part of my responsibilities here.

- Handled the frontend part of ONE Timesheet portal, where employee's logs their work hours.
- Worked on OneSecure project handled its frontend part in Reactjs.
- Worked on Procurement project which was having front end in Angular and backend as Nodejs.
- Also handled the frontend and responsive development on ONE BCG evening entertainment group admin. This website is use to book the evening events in the corporate and night life.

UI Developer

Nov 2016 - Mar 2018

Steg Technologies • Mohali, Punjab

Collaborated with designers and marketers on creating sales materials and traditional web design and marketing assets. Identified issues uncovered by testing or customer feedback and implemented solutions. Tested technical feasibility of UI and UX designs to meet project goals.

- Worked as UI Developer in ecommerce websites using MarketLive platform.
- Handled all website single handedly.

- Responsibilities to handle the responsiveness of websites on devices. And also get recognition from customer for my work
- Also, worked on ADA compliance for e-commerce sites.

Software Engineer (UI)

Feb 2014 - Nov 2016

Trantor Software Pvt. Ltd. • Chandigarh

Redesigned sections of websites to create user-friendly, visually appealing experience. Improved coding of JavaScript and CSS to enhance user experience and functionality. Implemented responsive designs for already built-in websites as per client requirements.

- Worked as UI Developer in websites created in PHP.
- Also worked on emailers (Email Template) a project from Google.
- Worked on Windows 10, Linux and Mac OS.

PROJECT HIGHLIGHTS

Onboarding Portal (2022): The onboarding of a new hire, which includes pre-onboarding and onboarding for new associates, is started by recruiters through this portal and lasts up until the employee's first day of employment. It starts as soon as the new position is required in the business. Greeting the new hires, orientation, providing job-specific trainings, and assisting them in adjusting to their new position, buddy connect and manager connect.

Technologies Used: **Reactjs**, HTML5, CSS3, Material UI, Typescript, Sharepoint Online for backend.

Risk Analytics (2021) : The data science team applies their algorithms to patient medical records and is able to determine the patient's potential risk score for any condition. By informing the patient of the circumstance that would probably emerge, the insurance companies benefited.

Technologies Used: FrontEnd was built in **Reactjs** and backend was Java and various machine learning tools

Offboarding Portal (2019): This portal was developed to help employees move smoothly after submitting their resignations. Make sure to gather all equipment and services before an employee's last day on the job, including hardware, account logins, uniforms, and ID badges. Obtaining departmental clearances and sending reminder emails for approvals. It is employed to manage all pending, current, and new offboardings inside the organisation.

Technologies Used: **Reactjs**, HTML5, CSS3, Material UI, Sharepoint Online for backend.

ONE Secure(2018): The goal of this project is to reduce credit card fraud in the US. The client ran a number of clubs around the nation, and patrons had to use a mobile app to simultaneously scan their photo ID card and credit card when making payments. Reactjs was used to develop the dashboard, which stores user information and payment information that

can be exported and presented to bank representatives in the event of a false complaint.

Technologies Used: Reactjs, .Net, HTML5, CSS3, Ionic4 for mobile app.

Other Projects: Photo Blog, Timesheet, CLAP Initiative, Media Gallery, Badge Id Cards all were created using ReactJs.

EDUCATION

Post Graduate Diploma in Computer Applications

Punjab University • Chandigarh, India

Sept 2020 – July 2021

Bachelor of Technology in Electronics & Communications

Punjab Technical University • Punjab, India

Aug 2009 - Jun 2013

AWARDS AND HONOURS

Spot Award

2022

Presented by **Lead Application Developer** at Edifecs Technologies. He quoted “Saniya has been invaluable in supporting associates on Enet and other IT applications, many outside her direct domain. She's had to do a ton of self learning of new and evolving web-based skills and technologies (and their bugs!) to do this while building out numerous new business applications - CLAP, Offboarding, Badge profile/print, OrgWizard, etc. - to meet various departmental needs.”

Star Award

2021

Presented by **HR Business Partner** at Edifecs Technologies. She quoted “I would like to nominate Saniya for her successful accomplishment on two major P&C projects:

1. New Hire Central Site
2. CLAP initiative

New Hire Central: Created a dedicated site showcasing important information in the form of all documents for all new hires. She's applied different functionalities while displaying the information which looks interactive and presentable.

CLAP: Built a user-friendly platform using which associates can send an e-card to their colleagues to display their gratitude and stay connected even when everyone is working virtually. We've got around 600+ submissions from India associates itself and from US Associates as well, the project has garnered good appreciation.

This reward is a token of appreciation for some of her skills - collaboration, multi-tasking, detailed oriented and timely deliverables.”

Young Achiever Award

2015

Presented by Team Manager of Trantor Software Pvt. Ltd.

OTHER SKILLS

- Self-motivated with good interpersonal and communication skills.
- Excellent problem solving and analytical abilities and willingness to learn new processes and technologies.
- Ability to work independently as well as in a team.
- I am open-minded to another person's views.
- Expertise in understanding Business Requirement Specifications and Functional Requirement Specifications and converting into comprehensive code blocks.
